

MARIANO MARCOS STATE UNIVERSITY

SAFE AND AFFORDABLE DRINKING WATER PROGRAM

MMSU with its campaign to reduce the generation of plastic wastes in the university created an integrated approach of addressing the said problem while providing an affordable and safe drinking water to students. **Hydration Stations** in the different Colleges of the University were already launched in 2023 with the goal of providing an accessible and affordable drinking water to students while creating the awareness on the importance and advantage on the non-consumption of bottled water.

This program of the colleges is building awareness as well as safeguarding the health of the MMSU community.
