

MARIANO MARCOS STATE UNIVERSITY

7.4.3 Energy and the Community

As part of its commitment to energy efficiency and clean energy, the university conducts a variety of activities and training programs for both its constituents and the broader community. Regular training sessions, including energy audits, provide crucial support and raise awareness of renewable energy's importance.

Through the achievements of MMSU's NBERIC through the AREC, the university has established itself as a regional hub for Renewable Energy (RE). Numerous government units now rely on MMSU NBERIC for expert consultations on RE projects. These consultations encompass a wide range of initiatives, including contributions to the RE Development Plan of Mariano Marcos Memorial Hospital-MC. This collaborative, knowledge-sharing environment fosters the effective implementation of sustainable energy solutions and promotes cost-efficient strategies across the region.
