

MARIANO MARCOS STATE UNIVERSITY

13.3.2 Climate Action Plan, shared

Year: 2023

MMSU has developed a comprehensive Climate Action Plan, integrated into its 20-year Land Use Development and Infrastructure Plan (LUDIP) named SIRMATA 2040, approved by the Commission on Higher Education Technical Working Group. This plan outlines sustainable infrastructure and land use strategies that align with national laws like RA 11396 and position the university as a leader in climate resilience. The collaborative formulation of SIRMATA 2040 included consultations and partnerships with local government units (LGUs) of Batac, Laoag, Paoay, Dingras and Currimao, Ilocos Norte, who supported the plan with public endorsements and financial backing. This demonstrates MMSU's commitment to transparency and proactive engagement with local communities, ensuring shared efforts towards sustainability and climate action.
