

## MARIANO MARCOS STATE UNIVERSITY

### 7.2.4 University Measures Towards Affordable and Clean Energy

The Energy Management Committee establishes comprehensive guidelines, plans, and policies, alongside best practices aimed at reducing energy consumption across the university. These policies are consistently reiterated to ensure all university constituents adhere to energy-saving protocols. Energy efficiency and conservation measures are actively enforced across all units and offices, with a strong emphasis on the adoption of high-efficiency appliances to replace or upgrade existing equipment. Additionally, any building upgrades or retrofitting projects are required to comply with the standards set by the Energy Management Committee, promoting sustainable infrastructure throughout the campus.
