College Extension Programs/Projects

The following are extension programs/projects implemented by the colleges to transfer information and technologies generated in the colleges:

- Skills and Livelihood Trainings.** The trainings aim to develop/enhance the skills of the participants on the various livelihood opportunities which they can use to earn a living. The trainings included: food processing, garments and accessory production; vehicle maintenance; and desktop publishing software.
- Community Based Rehabilitation Program.** The CBR project aims for community folks to acquire a high level of knowledge regarding disability, rehabilitation, physical therapy, and related issues; raise their level of awareness about rehabilitation and disability issues; understand the concepts of the CBR program; and appreciate the importance of rehabilitation and physical therapy in health promotion and consciousness.
- "Pagrang-ayen ni Manggalap."** The program is implemented to help partner-clients improve the level of living of the fishing households through effective and efficient extension activities for sustainable development. It aims to engage in technology transfer for the sustainable development of fishery and aquatic resources; enhance public awareness about the importance of conserving the fishery and aquatic resources; and provide and disseminate sound information and technology for sustainable aquatic development.

QUALITY POLICY

We commit to optimize our mandated services in instruction, research and extension by implementing our Quality Management System (QMS) that proactively empowers our stakeholders as we synergistically respond to our evolving needs and aspirations toward sustainable development and inclusive growth.

Thus, we shall continuously review and improve our QMS in accordance with legal, ethical, and other requirements.

Shirley G. Aguilas, Ph.D.
University President
