

MARIANO MARCOS STATE UNIVERSITY

7.2.1 University Measures Towards Affordable and Clean Energy

Mariano Marcos State University (MMSU) has established a comprehensive policy on energy efficiency and conservation in compliance with the government's Energy Management Program and in alignment with Sustainable Development Goal (SDG) 7: Affordable and Clean Energy. This policy, which is publicly accessible on the MMSU website, mandates that all building renovations and new constructions adhere to energy efficiency standards.

The policy goes beyond compliance, as it incorporates power generation initiatives, specifically through the consideration of solar photovoltaic (PV) systems to support sustainable energy sourcing. Additionally, all plans and designs for future infrastructure projects follow energy-efficient building principles, reflecting MMSU's commitment to minimizing environmental impact. These policies and design standards are integral to the MMSU Land Use Development and Infrastructure Plan, adopted in 2021, which guides the university's sustainable development approach and advances its dedication to ensuring access to affordable, reliable, and modern energy solutions.
